PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/613,053

Applicant(s)

IMAMURA ET AL.

Examiner

David T. Fox

Art Unit

1638

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 July 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 24-26, 28, 29, 32, 34, 37-41, 43, 44, 47, 53, 54, 59-64, 70 and 73-101 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 24-26, 28, 29, 32, 34, 37-41, 43, 44, 47, 53, 59-64, 70 and 73-100 is/are rejected.
- 7) ☒ Claim(s) 54 and 101 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☒ Certified copies of the priority documents have been received in Application No. 10/451,366.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 1638

Withdrawal from Issue

The indicated allowability of claims 24-26, 28-29, 32, 34, 37-41, 43-44, 47, 53, 59-64, 70 and 73-100 is withdrawn in view of the newly discovered reference(s) to Brown et al. Rejections based on the newly cited reference(s) follow.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 59-64, 70 and 73-100 are rejected under 35 U.S.C. 102(e) as being anticipated by Brown et al (US 2003/126646 A1, effectively filed 21 July 2001).

The claims are broadly drawn to isolated DNA encoding a radish protein which restores male fertility, said protein having at least 97% homology to SEQ ID NO:3; vectors and transformants comprising it; wherein the transformants may be bacteria such as E. coli or Agrobacterium, plant cells or seeds or whole plants of the genus Brassica and the species Brassica napus; wherein the transformed Brassica plants may have glucosinolate contents of at most 30 or 12 micromoles/g seed, i.e. the canola standard; and methods for using said transformed Brassica plants to cross with cytoplasmic male sterile Brassica plants, for maintaining the male sterile plants.

Brown et al teach the instantly claimed subject matter (see, e.g., pages 1-4 and pages 16-23; claims 1-50, wherein SEQ ID NO:88 is the restorer protein encoded by

Art Unit: 1638

"Gene 26" namely SEQ ID NO:89.) The attached Sequence Search results show that SEQ ID NO:88 taught by Brown et al is 99.2% homologous to instantly claimed SEQ ID NO:3. Furthermore, Brown et al teach a cDNA clone encoding this protein, with 99.0% similarity to instant SEQ ID NO:2; and a genomic clone encoding this protein, with at least 99.7% homology to SEQ ID NO:1.

Claims 24-26, 28-29, 32, 34, 37-41, 43-44, 47, 53, 59-64, 70 and 73-100 are rejected under 35 U.S.C. 102(e) as being anticipated by Brown et al (US2003/0237112 A1, effectively filed 12 July 2001).

The newly included claims are drawn to isolated DNA which encode a protein with 100% homology to SEQ ID NO:3; as well as methods of its use to transform plants and restore male fertility, wherein the male sterility was derived from Ogura or Kosena radish.

Brown et al teach an isolated DNA encoding a radish fertility restoration protein comprising SEQ ID NO:179 (formerly SEQ ID NO: 129 encoded by "Gene 26"; sequence identifier changed during prosecution) which is 100% identical to SEQ ID NO:3 (see enclosed sequence search results), as well as transformants, wherein transformed Brassica or Brassica napus plants (including those with low glucosinolate levels) may be crossed to male sterile Brassica plants containing Kosena or Ogura-derived cytoplasm (see, e.g., pages 1-4 and 16-23; claims 1-44).

Art Unit: 1638

Conclusion

Claims 54 and 101 are deemed free of the prior art, given the failure of the prior art to teach or reasonably suggest isolated DNA molecules comprising SEQ ID NOS:1-2 (see the attached Sequence Search results).

Claims 54 and 101 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

No claim is allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David T. Fox whose telephone number is (571) 272-0795. The examiner can normally be reached on Monday through Friday from 10:30AM to 7:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anne Marie Grunberg, can be reached on 571-272-0975. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

RESULT 10

US-10-195-144-88

; Sequence 88, Application US/10195144

; Publication No. US20030126646A1

; GENERAL INFORMATION:

; APPLICANT: BROWN, GREGORY G.

; APPLICANT: FORMANOVA, NATASA

; APPLICANT: DENDY, CHARLES

; APPLICANT: LANDRY, BENOIT S.

; APPLICANT: CHEUNG, WING

; APPLICANT: JIN, HUA

; TITLE OF INVENTION: NUCLEAR FERTILITY RESTORER GENES AND
METHODS OF USE IN

; TITLE OF INVENTION: PLANTS

; FILE REFERENCE: 16313-0136

; CURRENT APPLICATION NUMBER: US/10/195,144

; CURRENT FILING DATE: 2002-10-01

; PRIOR APPLICATION NUMBER: 60/305,026

; PRIOR FILING DATE: 2001-07-12

; PRIOR APPLICATION NUMBER: 60/305,363

; PRIOR FILING DATE: 2001-07-13

; PRIOR APPLICATION NUMBER: 60/308,736

; PRIOR FILING DATE: 2001-07-30

; NUMBER OF SEQ ID NOS: 128

; SOFTWARE: PatentIn Ver. 2.1

; SEQ ID NO 88

; LENGTH: 707

; TYPE: PRT

; ORGANISM: Raphanus sativum
